EDUCATION

University of Business and Technology (UBT)

Prishtinë, Kosovë

B.Sc. in Computer Science and Engineering

Expected Graduation, June 2025

- **Concentrations:** Currently working on my thesis in the field of Software Engineering
- **Related Coursework:** Data Structures & Algorithms, Software Design, Project Management, Software Testing and Maintenance, Embedded Systems, Software Architecture, Computer Systems Engineering, Computer Architecture and Organization, Operating Systems, Object-Oriented Programming, Discrete Mathematics.

EXPERIENCE

Internship Program (Starlabs) – React Developer

Prishtinë, Kosovë

January 2023 – March 2023

- Collaborated with designers and backend developers to transform **UI/UX concepts** into **interactive interfaces** using **React.js**, ensuring alignment with business requirements.
- Built **reusable components** such as forms and modals, enhancing user engagement and reducing development time by **20%**.
- Worked effectively in a **remote environment** using **Slack** and **GitHub** for daily coordination, participating in **code reviews** to maintain high code quality.

Kuma Digital – Junior React Developer

Remote - Switzerland

April 2024 – December 2024

- Converted detailed designs into **pixel-perfect interfaces** using **React.js** and **Tailwind CSS**, optimizing **user experience** across various devices.
- Implemented **dynamic features** like responsive navigation and interactive modals, increasing **client satisfaction** based on stakeholder feedback.
- Contributed to a **remote team** via **Zoom** and **GitHub**, following **Agile processes** like sprint planning to meet project deadlines consistently.

Xpertt Technologies – Full Stack Developer

Prishtinë, Kosovë

January 2025 - Present

- **Developed and maintained** scalable web applications using **.NET (C#) for backend** and **React/Angular** for frontend, ensuring seamless integration between client and server-side components.
- **Designed and optimized SQL databases**, including writing complex queries, stored procedures, and indexing strategies to enhance performance.
- Implemented CI/CD pipelines with tools like GitHub Actions/Azure DevOps, ensuring smooth and automated deployments.
- **Developed RESTful APIs** and integrated third-party services to enhance application functionality and interoperability.
- Ensured high code quality by following best practices, writing unit/integration tests, and conducting peer code reviews.
- Collaborated with cross-functional teams, including designers, backend developers, and DevOps engineers, to deliver high-quality software solutions.

PROJECTS

Cars Marketplace (Full-Stack)

Individual

Prishtinë, Kosovë

June 2025 – Present

- Built a full-stack marketplace platform for buying and selling cars, featuring a React + TypeScript (Vite, Tailwind) frontend and a Node.js/Express + TypeScript backend.
- Designed and implemented authentication with JWT and role-based authorization (admin, dealer, user), including protected routes and session handling on the frontend.
- Integrated dealer payments and subscription flow using **Stripe** (Checkout, payment event webhooks, success/failure pages, subscription status management).
- Developed a **single-page application (SPA)** with reusable UI components (UI kit, cards, modals) and clean state

management for filters, search, and listings.

- Ensured high performance and smooth UX with **code-splitting/lazy loading**, modular components, and full mobile/desktop responsiveness.
- Containerized the application with **Docker**, served the frontend via **Nginx**, and prepared deployment pipelines with **Google Cloud Build**.
- Link : <https://www.vetura365.com>

EDMA GmbH

Individual

Prishtinë, Kosovë

April 2025 – June 2025

- Developed a fully responsive web application using React, ensuring seamless user experience across mobile and desktop devices.
- Optimized application performance, reducing load time by 30% through efficient state management and lazy loading techniques.
- Implemented reusable and modular components, improving development efficiency and maintainability.
- Project Demo: <https://a-telaku.netlify.app/>

Movie TV Tracker

Individual

Prishtinë, Kosovë

July 2025 – Present

- Developed a dynamic web application using React and Node.js, enabling users to watch dubbed movies in Albanian with a seamless streaming experience.
- Implemented an efficient backend with Node.js and Express, optimizing API performance and reducing response times by 30%.
- Designed a fully responsive UI with React, ensuring smooth navigation and user-friendly experience across all devices.
- Integrated secure authentication and user management features, enhancing content accessibility and personalization.
- Optimized media handling and streaming performance, ensuring high-quality playback with minimal buffering.

Resume AI

Individual

Prishtinë, Kosovë

February 2025 – March 2025

- Developed an AI-powered resume analysis platform using Node.js, enabling users to upload CVs and receive detailed feedback on areas for improvement.
- Integrated advanced Natural Language Processing (NLP) models to assess resume content, structure, and keyword optimization, enhancing job application success rates.
- Optimized document parsing and data extraction, reducing analysis time by 40% while maintaining high accuracy in recommendations.
- Implemented an intuitive and user-friendly interface, ensuring seamless resume uploads and real-time feedback generation.
- Enhanced system reliability and scalability by leveraging cloud-based AI services, enabling efficient processing of large volumes of resumes.

DevLobby

Team Leader

Prishtinë, Kosovë

September 2023 – January 2024

- Developed an interactive platform using React, allowing developers to engage with fun and challenging coding puzzles.
- Designed a sleek and responsive UI, ensuring an optimal gaming experience across all devices.
- Optimized application performance by leveraging React hooks and state management techniques, resulting in a 25% improvement in load times.
- Enhanced user engagement by integrating leaderboard features and progress tracking, fostering a competitive and enjoyable environment.

June 2024 – July 2024

- Developed a dynamic news management platform using HTML, CSS, and PHP, allowing users to add, edit, and delete news articles efficiently.
- Implemented a user-friendly admin panel for seamless content management, improving workflow efficiency.
- Optimized database queries and backend logic, reducing page load times by 30% and enhancing overall performance.
- Designed a fully responsive layout to ensure accessibility and readability across all devices.
- Enhanced security measures by implementing input validation and SQL injection protection, ensuring data integrity

SKILLS

Programming: Java, C# Python, JavaScript, HTML/CSS, SQL, Node.js, Express.js, React.js, Angular.js, .NET, Next.js, Vue.js, Typescript, PHP, Wordpress

Tools: IntelliJ, VSCode, AWS, GCP, Azure, Git, Bootstrap, Agile, Docker, Kubernetes, Tailwind, Postman, MySQL, PostgreSQL, GraphQL, MongoDB, MSSQL, Firebase, Supabase, MaterialUI, Figma, UI/UX
